current electricity bills

No maintenance  
cost

Green labelling on  
business

No hassle with licensing

No hassle on  
installation

# Example Calculation

*PT. SOLARDEX ENERGY INDONESIA*

## % Discount from the tarif cost of the client

1. 15% from the PLN tariff (Rp. 1,035.78)
2. Per kwh cost from us will be Rp. 880.41 instead of the full amount (1,035.78)
3. So if they need about 5,000 kwh per month, per kWh cost will be  $1,035.78 - 880,41 = \text{Rp. } 155.36$
4. Monthly savings will be  $155.36 \times 5,000 \text{ kwh} = \text{Rp. } 776.800$
